

2026 Immcantation Users Group Meeting

Who: Open to the public
 When: January 22nd, 2026
 (10:00am - 1:30pm ET)
 Where: Virtual
 Fee: \$0, it's free!

immcantation.org

START	SPEAKER	AFFILIATION	TITLE
10:00 am	Kleinstein lab	Yale University (US)	Welcome
10:10 am	Mr. Titas Grabauskas	The Jackson Laboratory for Genomic Medicine (US)	Latent CMV is Associated with Putative CMV-specific Clonal Expansion in Th1 and GZMK⁺ CD8 T Cells
10:30 am	Mr. Kevin Sung	Fred Hutch Cancer Center (US)	Nucleotide Context Models Outperform Protein Language Models For Predicting Antibody Affinity Maturation
10:50 am	Dr. Seyedmojtaba Seyedraoufi	University of Oslo (NO)	GATHeR: Graph-based Accurate Tool for immunoglobulin HEavy- and light-chain Reconstruction
11:10 am	Prof. Nadia Tahiri	University of Sherbrooke (CA)	New Generalized Metric Based on Branch Length Distance to Compare B Cell Lineage Trees
11:30 am	Mr. Vishal Rao	Icahn School of Medicine at Mount Sinai (US)	Clonotype-specificity reveals differential roles of somatic hypermutation in epitope targeting
11:50 am	Break		
12:10 pm	Dr. Patrick Madden	La Jolla Institute for Immunology (US)	Germline-targeting vaccination elicits HIV broadly neutralizing antibodies in nonhuman primates
12:30 pm	Mr. Eric Zhang	Columbia University Irving Medical Center (US)	Tissue-directed maintenance of vaccine-specific human B-cell memory
12:50 pm	Dr. Kristen Wells	University of Colorado Anschutz Medical Campus (US)	Activated Polyreactive B Cells Are Clonally Expanded in Autoantibody-positive and Patients with New-Onset Type 1 Diabetes
1:10 pm	Dr. Money Gupta	University of New South Wales (AU)	Early emergence of signatures associated with HCV infection outcome

Note that all times shown here use ET.

The meeting will start shortly.

To reduce noise, everyone is muted upon entry and during the presentation.

Use the chat to submit your questions.

2026 Immcantation Users Group Meeting

Organized by:

Kleinstein¹, Yaari¹ and Hoehn² Labs

(1) Yale, (2) Dartmouth

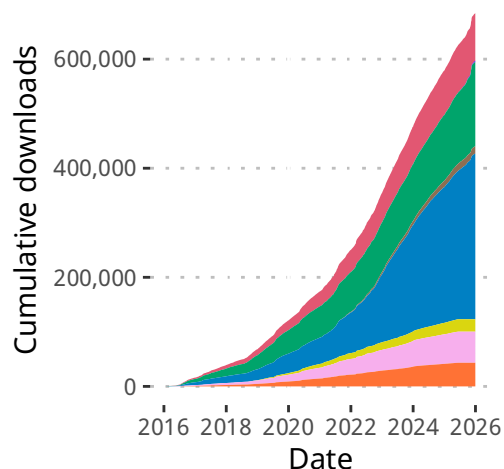

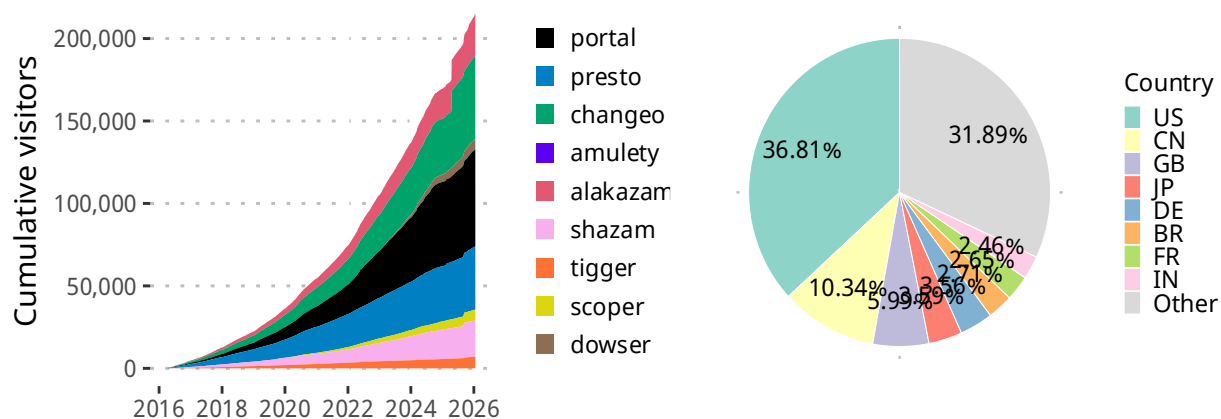

Immcantation Users

2026 Immcantation Users Group Meeting participants

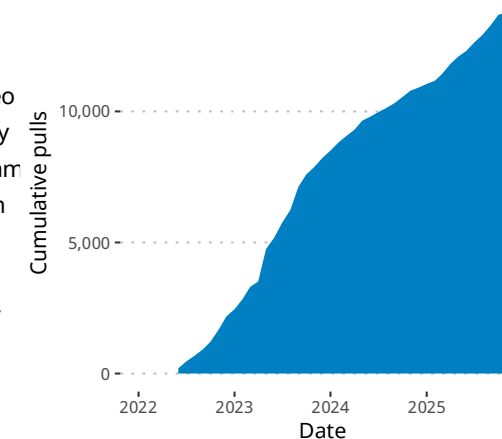

77% academic
11% industry

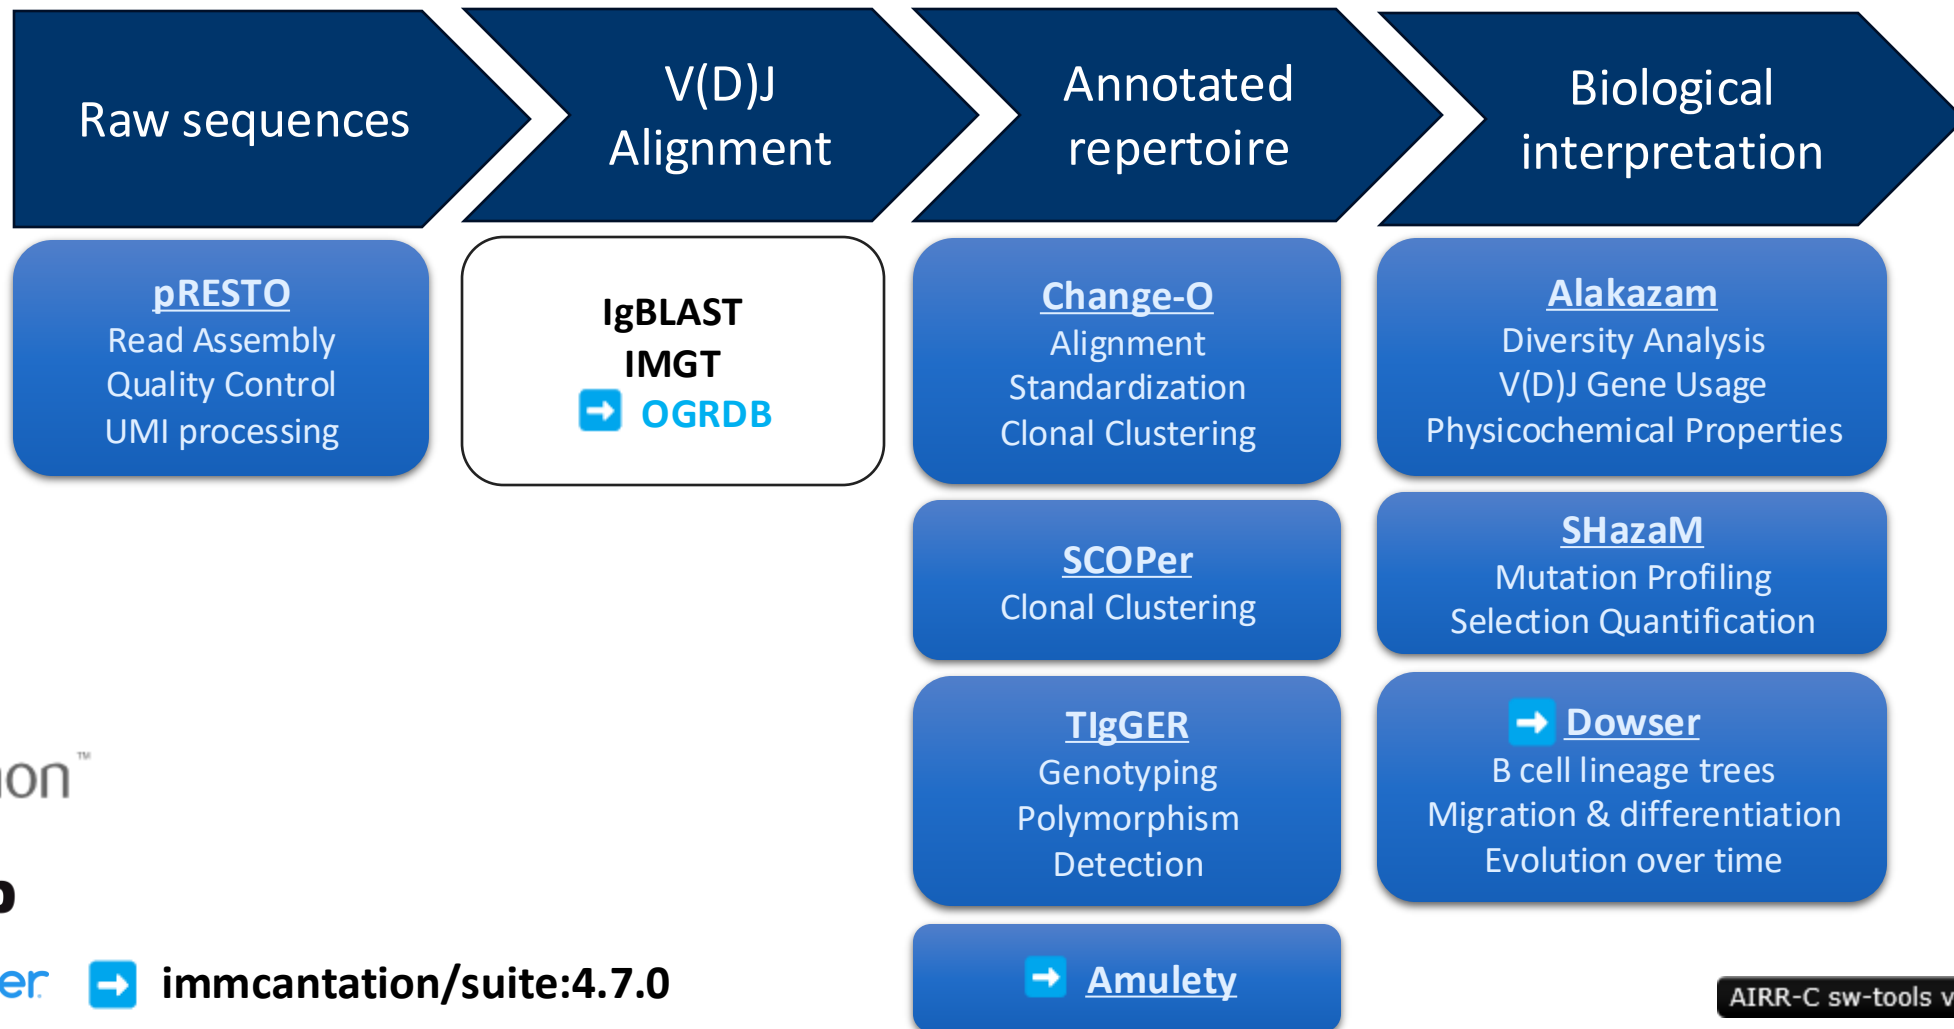

Unique visitors to the documentation sites

docker.io/immcantation/suite

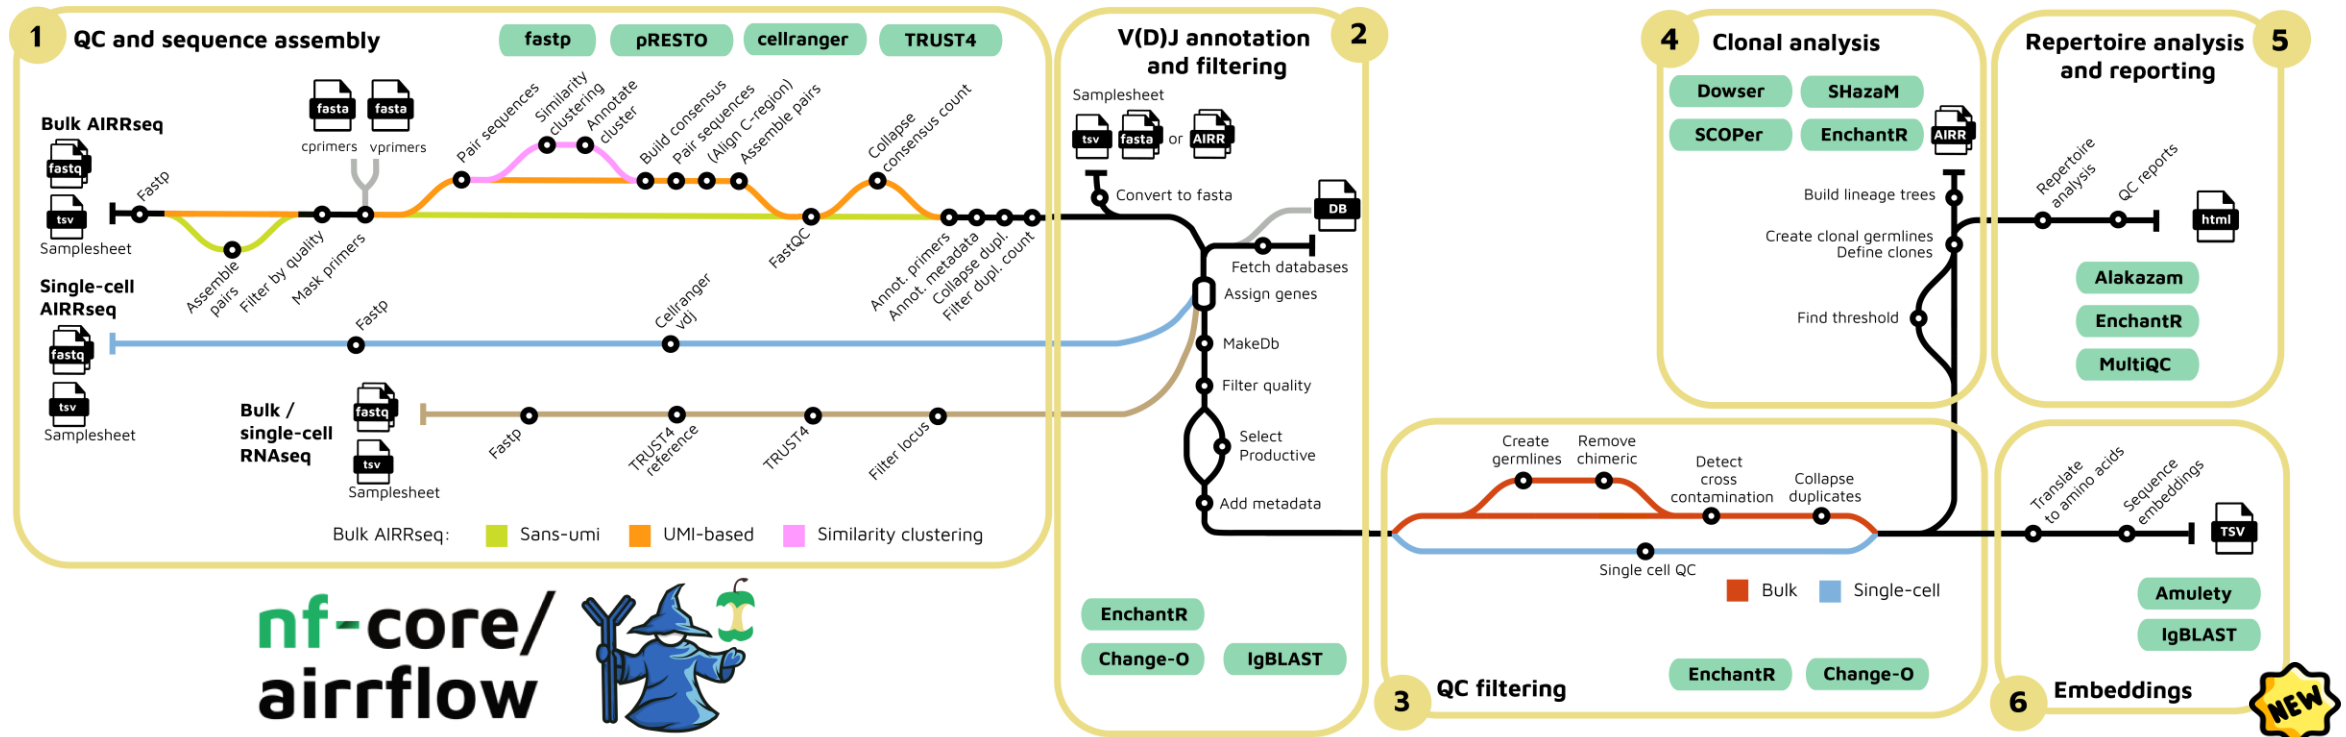

Start-to-finish analytical ecosystem

immcantation.org | immcantation@googlegroups.com | <http://airr-community.org> | <https://ogrdb.airr-community.org>

nf-core/airrflow: a single-launch pipeline for Immcantation

- Includes optional sequence assembly with pRESTO, clonal clustering with SCOPer, tree reconstruction with Dowser, clonal diversity analysis with Alakazam, SHM analysis with SHazaM, and sequence embedding with Amulety.
- Supports bulk and single-cell AIRR-seq data analysis, and extraction of BCR and TCR sequences from RNA-seq and scRNA-seq with TRUST4.

Some goals for Immcantation in 2026

- Adding support for AIRR-C germline reference hosted in OGRDB
- Genotyping subworkflow integration into nf-core/airrflow using TlgGER
- Exploring support for identifying insertions and deletions introduced by SHM
- Methods
 - Adaptive imMUNE receptor Language model Embedding (Amulety)
 - Working on improving the clonal assignment step performance
 - Lineage reconstruction and analysis (Dowser: TyCHE, SimBLE)
- Keep improving training and user support for different profiles of users
- Improve development processes and infrastructure (contribution guidelines, testing coverage)

TyCHE and SimBLE preprint:

AIRR-C Meeting VIII: Decoding and Recoding Immunity

<https://airr-community.org/meetings>

- Workshops:
 - The Fundamentals of Immunology
 - AIRR-seq Data: Processing & Analysis
- Software Demos
- Software Tutorials

Keynote Speakers

- David Schatz, Yale University, US
- Deborah Dunn-Walters, University of Surrey, UK
- Gabriel Victora, The Rockefeller University, US
- Mark Davis, Stanford University, US
- Steven H. Kleinstein, Yale University, US

Invited Speakers

- Aleksandra Walczak, Sorbonne Université and Université de Paris, FR
- Armita Nourmohammad, Yale University, US
- Ayelet Peres, Yale University, US
- Bjoern Peters, La Jolla Institute for Immunology, US
- Camila Coelho, Icahn School of Medicine at Mount Sinai, US
- Diyaa Ashour, University Hospital Würzburg, DE
- Frederik Matsen, Fred Hutch, US
- Hannah Meyer, University of Cambridge, UK
- John Tsang, Yale University, US
- Rob Miller, University of New Mexico, US

Current Immcantation Team

Kleinstein Lab (Yale)

Steven Kleinstein, PhD
Anthony N Brady
Professor of Pathology

Edel Aron
PhD Candidate

Dylan Duchon
Postdoctoral Fellow

Paris Filippidis, MD
Postdoctoral Fellow

Gisela Gabernet, PhD
Associate Research
Scientist

Cole Jensen, MPH
PhD Candidate

Wengyao Jiang
Student Programmer

Edward Lee, MD, PhD
Clinical Fellow

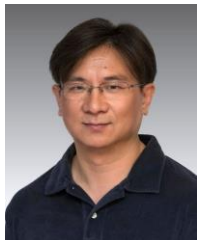

Noah Yann Lee
PhD Candidate

Huimin Lyu
Bioinformatics Programmer

Susanna Marquez
Bioinformatician

Hailong Meng, PhD
Senior Bioinformatics
Scientist

Burhan Sabuwala
PhD Student

Caroline Sullivan
PhD Student

Zhaochen Ye
PhD Student

Yaari Lab (Yale)

Gur Yaari, PhD
Associate Professor

Ayelet Peres, PhD
Postdoctoral Fellow

Hoehn Lab (Dartmouth)

Kenneth Hoehn, DPhil
Assistant Professor

Maria Cavallaro
PhD Student

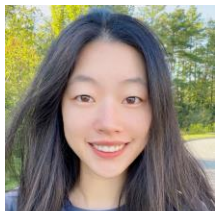

Jessie Fielding
Research Scientist

Hunter Melton, PhD
Postdoctoral Research
Fellow

Lowrey Peyton
PhD Student

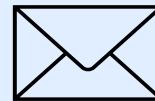

Sherry Wu
PhD Student

Thanks everyone for coming!!

- We will send out speaker answers to unanswered questions as well as a copy of these slides.
- Please fill out the post-event survey (it will be emailed out to all registered people)! We greatly appreciate your feedback.
- The videos (for everyone who agreed to be recorded) will be available online on the Immcantation YouTube.
